SUBMISSION FROM SCOTTISH ENTERPRISE

1. Information is business critical to Scottish Enterprise (SE). The way in which we manage, access, and store information has a major impact on business success and day to day operational running. As information volumes increase, we are mindful of the need to effectively manage our information and, especially, to comply with freedom of information regulations. We therefore strive for consistency and efficiency in the way we manage our information throughout its lifecycle based on recognised records management practices. The Bill will bring support and further consistency to this area.

Lena Wilson
Chief Executive
