Dear Sir/Madam,

My Father suffered for many years and eventually had to be hospitalized. Some of our most precious times were in those difficult days.

My daughter-in-law is a Doctor specializing in Palliative care and finds the care and help given, to be her chosen field due to its effectiveness. Patients find the
the care wonderful.

It does concern me that both the Netherlands and the US state of Oregon have found abuses of their legal systems of assisted suicide.

Neither the British Medical Association nor professional medical bodies support assisted suicide.

I do oppose the legalisation of assisted suicide and euthanasia for these and many other reasons.

Yours sincerely

Alastair Hutchison
